4. Erstellung eines neuen Repository

Start writing code

Start a new repository for phsg-mf

A repository contains all of your project's files, revision history, and collaborator discussion.

Repository name *

Public
Anyone on the internet can see this repository

Private
You choose who can see and commit to this repository

Create a new repository

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner * Repository name *

 phsg-mf /

✔ Your new repository will be created as Bescheide-STU.
The repository name can only contain ASCII letters, digits, and the characters -, -, and _.

Great repository names are short and memorable. Need inspiration? How about [super-duper-octo-sniffle](#) ?

Description (optional)

-  Public
Anyone on the internet can see this repository. You choose who can commit.
-  Private
You choose who can see and commit to this repository.

Initialize this repository with:

- Add a README file
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

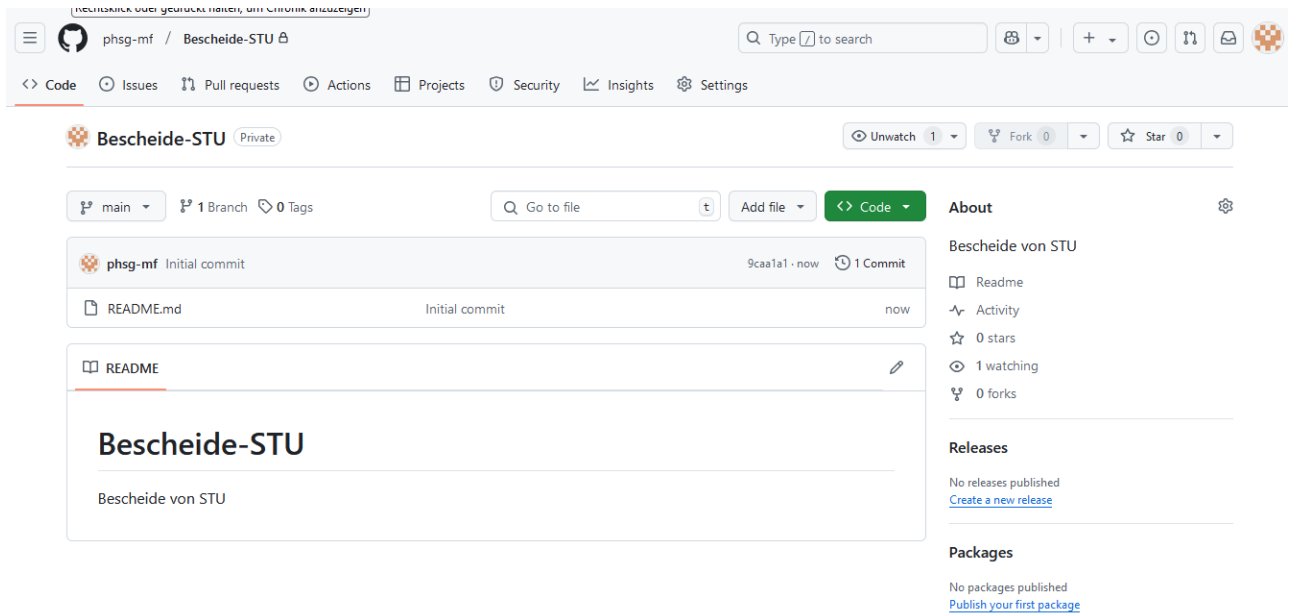

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

This will set  main as the default branch. Change the default name in your [settings](#).

 You are creating a private repository in your personal account.

Anlegen weiterer Repositorys

The screenshot shows the GitHub profile page for user 'phsg-mf'. At the top, there is a navigation bar with 'Overview', 'Repositories 1', 'Projects', 'Packages', and 'Stars'. A search bar is on the right. Below the navigation bar, the user's profile picture is a circular avatar with a pixelated orange and white pattern. To the right of the avatar is a search bar for repositories, filters for 'Type', 'Language', and 'Sort', and a green 'New' button. Below the search bar, the profile name 'phsg-mf' is shown with an 'Edit profile' button. The profile is marked as 'PH Private' and has a repository 'Bescheide von STU' listed with a 'Star' button. The user joined 34 minutes ago. At the bottom, there is a footer with the GitHub logo, copyright information, and links for Terms, Privacy, Security, Status, Docs, Contact, Manage cookies, and Do not share my personal information.

1.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner * Repository name *

 phsg-mf / APP-Bescheide

✔ APP-Bescheide is available.

Great repository names are short and memorable. Need inspiration? How about [congenial-carnival](#) ?

Description (optional)

Alle Bescheide von APP

-  Public
Anyone on the internet can see this repository. You choose who can commit.
-  Private
You choose who can see and commit to this repository.

Initialize this repository with:

- Add a README file
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: None ▾

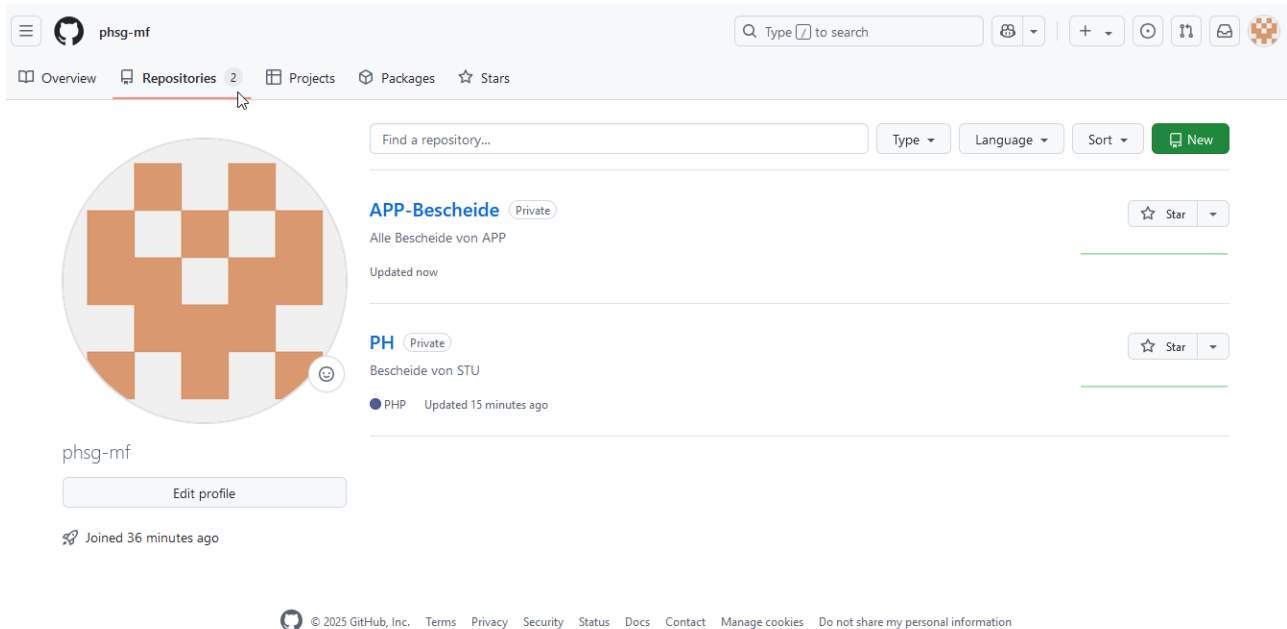

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

This will set  main as the default branch. Change the default name in your [settings](#).

 You are creating a private repository in your personal account.

Create repository

2.

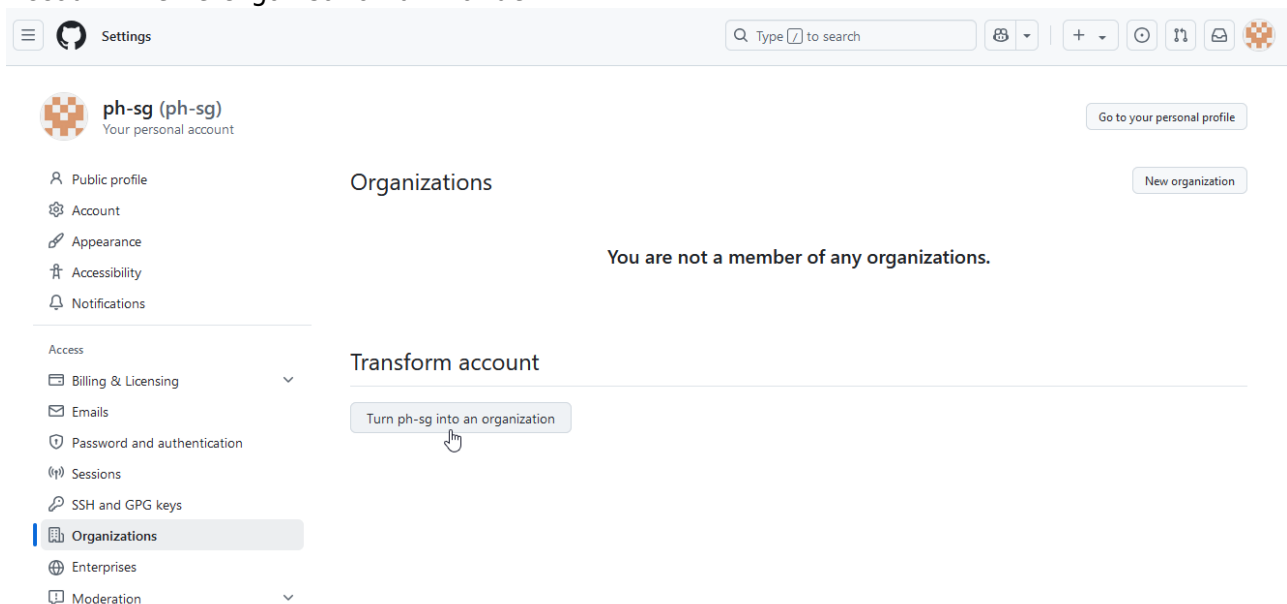

3.

User hinzufügen

Im Prinzip kann der gesamte Verein mit dem gleichen User ins GIT gehen (Datenschutz!!!). Daher macht es ggf. mehr Sinn, wenn jeder User einen eigenen Zugang hat. Das ist vor allem dann wichtig, wenn man sehen möchte, wer hat was an den Dateien geändert!

Man geht wie folgt vor:

1. Account in eine Organisation umwandeln

2. Vorher aber einen neuen Account anlegen, mit der man die Organisation bearbeiten kann. Organisation inzwischen umbenamt.

Account Transformation Warning ✕

What you are about to do is an irreversible and destructive process. Please be aware:

- You will no longer be able to sign in to ph-sg (all administrative privileges will be bestowed upon the owners you choose)
- Any user-specific information (OAuth tokens, SSH keys, Job Profile, etc) will be erased
- You will no longer be able to create or modify gists owned by the converted personal account
- Any commits and comments credited to ph-sg will no longer be linked to this GitHub account
- Any GitHub Apps installed on ph-sg will be uninstalled
- The total amount of collaborators across private repositories will be the total amount of seats for the organization

If you are using ph-sg as a personal account, you should [create a new personal account](#) before transforming ph-sg into an organization.

[Turn ph-sg into an organization](#)

3. Weitere User ins System hinzufügen

Start collaborating

Welcome to CM PH-SG

Add organization members

Organization members will be able to view repositories, organize into teams, review code, and tag other members using @mentions.

[Learn more about permissions for organizations](#) →

Search by username, full name or email address
